

We built the Guild Wars 2 community's favorite Discord app.

Your game & community deserves one too.

Your players already live on Discord, but Discord knows nearly nothing about your game. For Guild Wars 2, Aleeva bridges that gap: game accounts linked to Discord identities, automated verification and roles, events and news, running in production since 2018. Ready to give your players their companion?

Aleeva Proven in production with **Aleeva**, our verified Discord app for Guild Wars 2:

8'500+

Discord servers

72'000+

linked game accounts

222'000+

events organized

3.29M

DPS reports logged

What Aleeva does today

- **Live player stats:** players pull up their characters, progression and in-game stats right inside Discord
- **Member verification:** joins are checked against real game accounts before anyone gets in
- **Role & rank sync:** Discord roles mirror in-game membership and rank, automatically
- **Event management:** sign-ups, role compositions, reminders, dedicated channels, full history
- **News & notifications:** game news with AI summaries in 10+ languages, release notes and community feeds
- **Premium built in:** an optional premium tier through Discord's own subscription system

What your studio gets

- **Retention between sessions:** players stay connected to their account, guild and events, and get pulled back into the game
- **Healthier communities:** verified members and synced roles keep servers tidy, with less moderator busywork
- **Official-quality presence:** a polished companion carrying your brand where your players already are
- **Community signal:** aggregated, privacy-respecting insight into engagement across servers
- **None of the burden:** we build and operate the service; infrastructure and support are our problem

Ways we can work together

Custom companion

We design, build and operate a dedicated Discord companion for your game: your brand, your API, your feature set.

Partnership

We co-develop with your team: shared roadmap, your player insight and our experience, grown over the long term.

Your model

Licensing, revenue share or something else entirely. We're open to the structure that fits your studio best.

Typical engagements pair a scoped setup phase with an ongoing licence and operations subscription, sized to your game and community.

Why Viascom

Proven in production

Seven-plus years operating a verified Discord app at scale. Not a prototype.

Chosen by communities

8'500+ servers adopted Aleeva on their own, and communities pay for premium on top.

Fast to first result

We have built every piece of this before. A working prototype on your game's data takes weeks, not months.

Let's give your players their companion.

Make it happen with a first call.
